

I am applying my forty years of work and career experience accumulated in the military, employment, independent contractor, partnership, and self-entrepreneurship towards artistic pursuits to bring awareness to global conditions, social issues, and personal enlightenment.

Research Interests and Goals

- Learn more about the application of color and tones for 3D artwork in various formats. Then to use this to enhance 2D and 3D artwork creations to better impact the viewer.
- Pursue a study of how artwork has been used to portray the state of humanity through history. Then produce a paper presenting findings and theories on the development and interconnections of the diversity of human civilizations.
- Produce a series of artwork collections addressing global environmental issues, especially animal and habitat extinction. My effort is to show the commonalities and interconnections of life on earth as a living planet.

Formal Education & Training

Master's Level

Keller Graduate School of Management

- Master of Project Management
- GPA: 3.79
- Graduated with Distinction

Bachelor Level

DeVry Institute of Technology

- Bachelors of Telecommunication Management
- GPA: 3.85
- Dean's List
- Summa Cum Laude

Associate & Technician Level

ITT Technical Institute

- Associates of Computer Drafting and Design
- GPA: 4.0 • GPA 3.96
- Highest Academic Honors • President's Honor Roll
- Alpha Beta Kappa National Honor Society • Magna Cum Laude
- Prefect Attendance

Fort Scott Community College

- Associate of Science

United States Navy-Marine Schools South Oklahoma City Community College • Avionic Technician •
Hours towards Associates of Computer Science

- Helicopter System Organizational Maintenance Technician
- Letter of "Recognition for "superior scholastic
- 19 college credit hours earned.
- Completed 25 extra correspondence courses with a GPA of 3.73
- 43 hours with a GPA 3.94.
- Phi Theta Kappa - National Honor Fraternity.
- Member achievement of 97.62 GPA

Oklahoma State Department of Vocational and
Technical Education

- Certificate of Training

- 542 hours Advanced Arc welding and pipe fitting

Starbound Enterprises

- July 1973 to July 1981

Teaching and Material Production Experience

United States Navy/Marine Corps. Schools

As an educator, I've had success with course design in the military, customer service, and at DeVry University. I designed the first "occupational knowledge" program at Millington, Tennessee in the Navy: equivalent to a university strategies and career course. I am a firm believer in lifelong education and learning.

DeVry University

As a student at DeVry Institute of Technology, I convinced the Dean to allow my senior project team to find real world client. This enabled the methodology for integrating the assessment program and senior project capstone course to achieve university accreditation when I was the Senior Project Coordinator early in my professorship. I also won an award for the best teaching methods at the July 2000 University National Symposium.

Course Material Produced

Assessment Objective Outline
Documentation and Visio Hands-on Lab
Internetworking Models
Introduction to Teaming
Lab & Physics Supplement
Lecture Communications History
Lecture Intro to BTA (Business Technology Analysis) models

Lecture Math & Electronics
Lecture Technology & Society
Number Systems
Solving Series-Parallel Circuits
Standards & Organizations
Summary of Media Types and Standards
Transmission Media
WAN Circuit Speed Calculation

Skills

Adobe Dreamweaver	HTML coding	MS Visio Professional
Adobe Illustrator	Macromedia Studio 8	MS Word
Adobe Photoshop	MS Excel	MS. Office Professional
Autodesk AutoCAD	MS FrontPage	Paint Shop Professional 6
Autodesk Inventor	MS PowerPoint	Quicken Home & Business
Autodesk Rivet	MS Project	RFI & RFQ Writing
Contract writing	MS Publisher	Typing 60 WPM
Diagram and Blueprint Review	MS Server	

Art Experience

I've been doing artwork and hobbies in various forms for over fifty years now. During the late 1960s and early 1970s, I engaged in art and science programs at the Kirk Patrick Planetarium in the Oklahoma State Fairgrounds, where I created and sold my first artwork.

I've had a private tutor for artwork and music during my high school years. Various college courses allowed me to apply my art skills or even take electives applicable for art or theater. I've been able to apply my art skills throughout my professional career life. I've created university course materials, architectural and construction plans, network diagrams, clothing and custom gear designs.

I believe that visual art can be a strong communication and emotional experience just as is music, poem and prose. Our world and lives are too complex to remain a simpleton, you'd only get kicked to the curb of life. At times I can be a minimalist, seeking to use simple forms to express a broader meaning. Then I can be manically attentive to detail striving for a grander image. More recently, I've been focusing on a story based, issue addressing, emotional and historically significant. This led to the fifteen-piece set titled, A Crash of Rhinos.
